

## Little Monster® Postcards

These postcards were designed to be printed onto Avery® Postcards for Laser Printers #5389, 4" x 6".

Test print on plain paper before you begin. Test print on one sheet of Avery® Postcard paper before you print the whole batch.

Every printer feeds the paper into the printer differently.

It may help the paper slide if you place a plain sheet of paper onto the printer tray underneath the stack of postcard paper.

1. Place your Avery® Postcard paper into your printer. Place it into your printer in the vertical format.
2. Select your printer. Select the horizontal format for printing. Select — Print "Black."
3. Select — Print from Page "2-6," or print only the pages you want.
4. PRINT.
5. Color them, then add your message and address on the back. The image above show hoe you may want the address to appear.
6. Add a STAMP, and mail it to someone special!
